

INSTALLATION INSTRUCTIONS

Part Number 38-0735 / 38-0737 / 38-0739

This filter fits: See catalog for current applications

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Air Filter seals properly.

Installation

1. Remove Old filter from frame by flattening tabs on one side of "L" bracket only. Open frame up by lifting the top part of the frame. Remove stock paper filter and screen wire.
2. Clean inside of frame. Apply bead of K&N Sealing Grease to inside of frame where filter will seat.
3. Slip K&N air filter into frame. Push "L" bracket back into loops. Bend tabs back up on "L" bracket.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
