Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Filtercharger® seals properly.

### INSTALLATION:

1. Remove the stock air filter.
2. Carefully clean the inside of the air box and sealing surfaces.
3. Due to the variations in the air box sealing surfaces, a bead of 99-0703-1 air filter sealing grease (supplied) must be applied to the air box base (engine side) as shown. (Fig. 1)
4. Install the K&N® Air Filter with "This Side Out" facing the air box lid. (Figs. 2 & 3)
5. Reinstall the air box lid.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
