10. The 23-1/2” Hose is to be on the Drivers side. As shown.

11. The 10-1/2” Hose is to be used on the Passenger side as shown.

12. Secure the hose ends with the supplied Speed Clamps.

13. Double check your work. Make sure all Clamps are tight and reconnect the negative battery cable.

**WARNING!** If your vehicle has a Vehicle Emission Control Information decal affixed to the factory air box and it is removed, a new replacement label must be obtained and installed in a readily visible position in the engine compartment in order to remain CARB compliant. Failure to do so will prevent the vehicle from passing a smog check. Replacement labels can be ordered from your local dealership. Regulations state that the VECI label shall not be affixed to any equipment which is easily detached from the vehicle. Label placement, under the hood on a painted surface is recommended.

For your Oiled media filter we suggest using the AIRAID Filter Tune-Up Kit!

Synthamax Air Filters do not require oil. Service air filter as needed by cleaning with common non-petroleum all-purpose household cleaner and water. Simple Green®, Formula 409® or equivalent works great. Apply cleaner to outside of air filter and allow to soak. Then flush filter clean from the inside out with a garden hose and repeat steps if necessary. Do not apply high pressure water or air to clean filter. Allow filter to air dry and reinstall.
