

Installation Instructions

For Part Numbers:

- 510-213 720-476 Airaid Oiled Media Filter
- 511-213 721-476 SynthaMax Dry Media Filter - Red
- 512-213 722-476 SynthaMax Dry Media Filter - Black
- 513-213 723-476 SynthaMax Dry Media Filter - Blue

- 2007-2016 Toyota Tundra 5.7L V8
- 2008-2016 Toyota Sequoia 5.7L V8
- 2010-2018 Toyota Tundra 4.6L V8
- 2010-2012 Toyota Sequoia 4.6L V8

Component Identification

1	Airaid Premium Filter	1
2	Intake Tube	1
3	MAF Panel	1
4	Bottom Panel	1
5	Filter Adapter	1
6	Urethane Hump Hose	1
7	Silicone Reducing Coupler	1
8	Weather Strip 3 7/8"	1
	Hardware and Instructions	
9	6-32 x 5/16" Phillips Head Screw	4
10	#6 Flat Washer	4
11	Keyp Nut	4
12	8-32 x 3/8" Button Head Screw	2
13	Button Head Cap Screw	6
14	1/4" Flat Washer	8
15	1/4-20 Flange Nut	3
16	10-32 Well Nut	1
17	10-32 Hex Bolt	1
18	#10 Fender Washer	1
19	12mm Hex Bolt	2
20	Hose Clamp #52	1
21	#56 Hose Clamp	1
22	#72 Hose Clamp	2
23	Barbed Fitting	1
24	1/2" Barbed Connector	1
25	3/4 Speed Clamp	2
26	1/2" Breather Hose	1
27	Double Bend Bracket	1
28	L Bracket	1
29	#203 Bracket	1

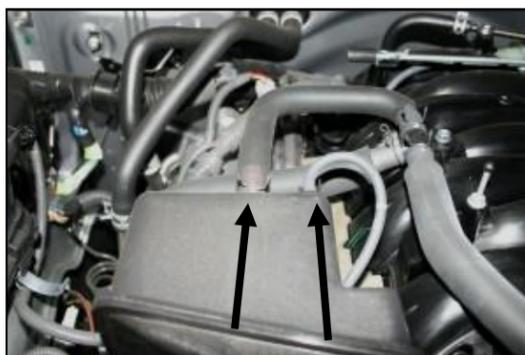

NOT LEGAL FOR SALE OR USE ON ANY POLLUTION CONTROLLED MOTOR VEHICLE IN CALIFORNIA OR STATES ADOPTING CALIFORNIA EMISSION PROCEDURES.

See AIRAID.COM for CARB status on each part for a specific vehicle.

Full color instructions can be viewed on our web site at Airaid.com. If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

- 1. Disconnect the negative battery cable.** Remove the factory beauty cover.
A) Loosen the hose clamp on the factory intake tube where it connects to the throttlebody.
B) Disconnect the Mass Air Flow sensor wiring harness.
C) Unsnap the wiring harness anchor from the factory airbox lid.

- 2. Disconnect the factory breather hose, and vacuum hose from the factory airbox lid.**

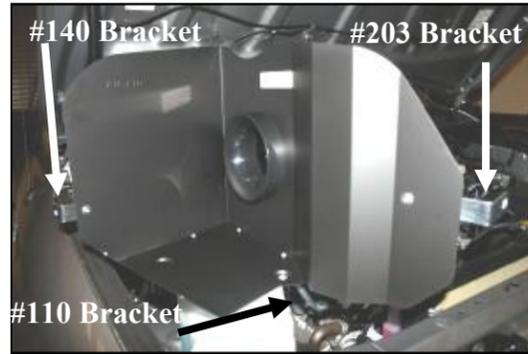

- 3. Unlatch the four metal clips that hold the airbox lid to the base and remove the intake tube and lid from the vehicle. Remove the factory air filter from the airbox base.**

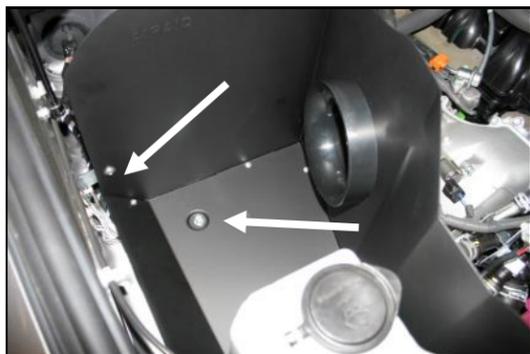

- 4. Using a 10mm socket, loosen the two bolts that hold the airbox base to the fender well, and remove it from the vehicle. There is one bolt on the front of the base, and one bolt at the rear of the base.**

- 5. Remove the rear ground anchor bolt from the side of the fender well and save it for reuse in step #7.**

- 6. Assemble the Cool Air Dam panels (#3 & #4) as shown using four 6-32 screws (#9), washers (#10), and keys nuts (#11). Install the filter adapter (#5) using three 1/4" button head bolts (#13) and washers (#14). Install the 3 brackets (#24), (#25), and (#26) as shown using three 1/4" bolts (#13), washers (#14), and nuts (#15). Just snug the bolts for now, they will be adjusted later.**

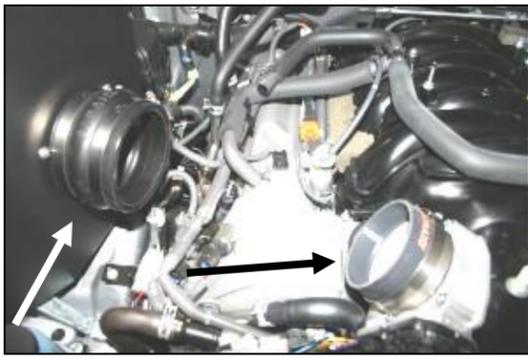

- 7. Install the CAD assembly into the vehicle. Align the hole in the bottom over the captured nut in the fender well. Install one 16mm hex nut (#16), and washer (#14). Leave loose for now. Next reinstall the factory bolt removed in step #5, thru the bracket, into the ground anchor in the fender well.**

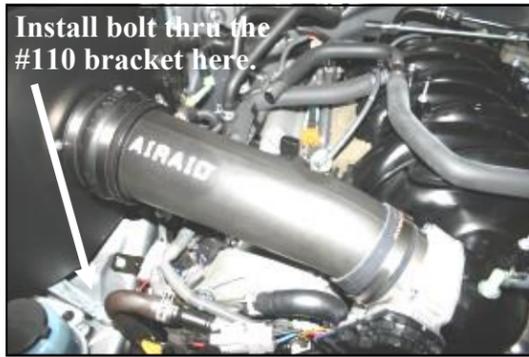

- 8. Remove two screws, and remove the Mass Air Flow sensor from the factory intake tube. Note the orientation of the sensor in the tube. It will need to be replaced in the same direction in the Airaid tube.**

- 9. Re-install the MAF sensor into the Airaid intake tube (#2) as shown using the supplied 8-32x3/8" button head screws (#12). Do Not Use The Factory Screws! Next install the 1/8NPTx3/16" barbed fitting (#20) into the Airaid tube.**

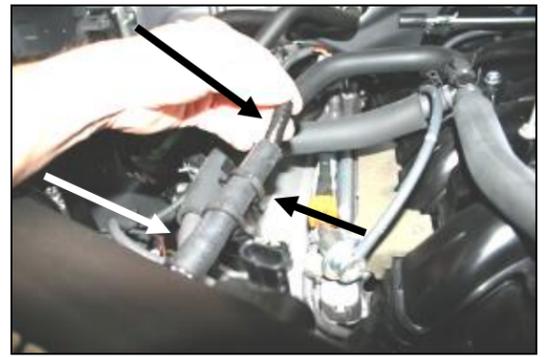

10. Install the hump hose (#6) with two #72 hose clamps (#19). Install the reducing coupler (#7) with the small end on the throttlebody. Install the #52 hose clamp (#17) over the throttlebody end, and the #56 hose clamp (#18) over the large end of the coupler. Leave the clamps loose for now.

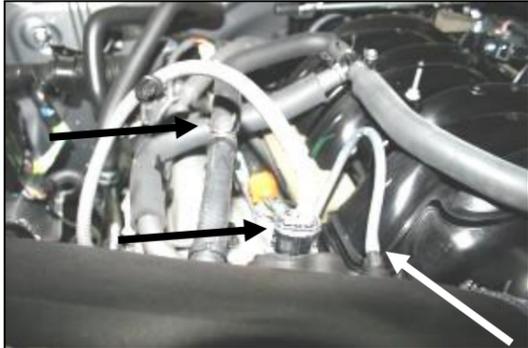

Install bolt thru the #110 bracket here.

11. Install the Airaid intake tube into the hump hose first, and then into the reducing coupler. Center the tube between the throttlebody, and the CAD, adjust for fit, and then tighten the four hose clamps. Install one 6mmx12mm bolt (#16) and washer (#14) thru the bracket into the captured nut in the fender well.

12. Install the 1/2" breather hose (#23) onto the nipple on the Airaid tube. Slide the 1/2" barbed coupler (#21) into the installed breather hose, and secure both ends with the supplied speed clamps (#22).

13. Reconnect the MAF wiring harness to the MAF sensor. Reconnect the factory breather hose to the 1/2" barbed coupler using the factory clamp. Reconnect the small vacuum hose to the 3/16" barbed fitting on the Airaid tube.

14. Place Well Nut into 3/8" hole in core support.

15. Use supplied 10-32 hex head bolt and Fender Washer to secure Panel Bracket. Do not over tighten.

16. Install the Airaid Premium Filter (#1) onto the filter adapter and tighten the clamp. Next install the weather strip (#8) on top of the CAD as shown. For an easier install, start at the fender side of the CAD and work your way towards the radiator. Reinstall the factory beauty cover. Apply the Airaid Decal to the Panel assembly as shown.

17. Double check your work!

Make sure there is no foreign material in the intake path. Make sure all clamps, hoses, bolts, and screws are tight. Periodically check the tightness of all hose clamps. Double check the hood clearance.

18. Reconnect the negative battery cable!

Full color instructions can be viewed on our web site at Airaid.com. Use the **Product Search** function to find your part number, and click **View Details**.

Thank you for purchasing the Airaid Intake System. Contact Airaid @ (800) 498-6951 8:00 AM - 5:00 PM MST weekdays for questions regarding fit or instructions that are not clear to you. Your Airaid Intake System was carefully inspected and packaged. Check that no parts are missing, or were damaged during shipping. If any parts are missing, contact Airaid. The air filter element is protected from direct exposure to water and debris, care should be taken not to drive through deep water. WATER INGESTION IS THE DRIVERS RESPONSIBILITY! The air filter is

For your Oiled media filter we suggest using the AIRAID Filter Tune-Up Kit!

SynthaMax

Do Not Oil

Synthamax Air Filters do not require oil. Service air filter as needed by cleaning with common non-petroleum all-purpose household cleaner and water. Simple Green®, Formula 409® or equivalent works great. Apply cleaner to outside of air filter and allow to soak. Then flush filter clean from the inside out with a garden hose and repeat steps if necessary. Do not apply high pressure water or air to clean filter. Allow filter to air dry and reinstall.

P/N 790-551 Aerosol Spray
