Washable CABIN AIR FILTERS

The K&N® washable cabin air filter is the first of its kind designed to replace your vehicle's stock cabin air filter with a washable and reusable version that cleans and freshens incoming air!

Washable and Reusable - designed to be cleaned and reused over and over

- Easy to clean and reuse
- Factory fit, pre-treated and ready to install
- 10 year / 100,000 mile limited warranty
- Advanced synthetic filter media
- Electrostatically charged to capture most mold, mildew, pollen, spores, fungus and germs
- Helps control odors

How to replace a cabin air filter
Most cabin air filters can be replaced without tools but some require basic hand tools to open the cabin air filter compartment. Detailed installation instruction sheets and videos are provided on the specific product web page for the filter that matches your vehicle.

Cleaning the K&N® Washable Cabin Air Filter

K&N® recommends servicing your washable cabin air filter every 12 months or 12,000 miles. This is similar to the typical recommended replacement interval for a disposable cabin air filter. Cleaning your K&N® washable cabin air filter is easy to do in just a few steps using the K&N® cabin air filter Refresher™ kit. It comes with a 12 ounce pump spray bottle of cabin filter cleaner that loosens dirt and road grime from your K&N® cabin air filter and helps remove trapped contaminants. Also included is an 8 ounce pump spray bottle of cabin air filter Refresher™, which increases the electrostatic properties of the cabin air filter helping it to trap contaminants. This long lasting formula helps eliminate the source of most odors and it is made from safe, biodegradable ingredients.

Installation videos and detailed instructions help make installation easy
